Commencement: May 17 & 18, 2001

A SOCRATIC INQUIRY:

What is Commencement?

Commencement is a window through which one views the panorama of the future, a panorama to be given color and form by imagination and daring. The horizon is vast and the features variable, ready to be defined by a steady hand and discerning eye.

Commencement is a threshold through which one steps into a world of new possibilities. Behind are the prescribed challenges of university life–tests to pass, papers to write, requirements to meet. Ahead is a world with few boundaries and fewer guidelines, a world that can be shaped by resolution and perseverance.

Commencement is a stairway beckoning toward unknown prospects and unmarked destinations. How far it climbs and where it ends one cannot yet see, but it is a stairway that, ascended with courage and spirit, can lead to a life fulfilled.

COMMENCEMENT MESSAGE

★

Congratulations to all our graduates. You have had your share of triumphs, and I suspect you have learned something about fortitude. I hope you have experienced joy.

As you set forth on your life's adventure, you are in good company. You are now a member of a family of more than 100,000 Stony Brook alumni, including university presidents, filmmakers, oceanographers, major league baseball players, a former United States ambassador, and a Grammy Award-winning opera singer. All have sat where you sit today.

I am optimistic that undergraduates have learned, along with calculus and Shakespeare and periodic tables, to connect with others, to cooperate, to work together for shared goals. Graduate students have learned that your profession, whatever you have chosen, will serve you well only if you serve others well.

I hope you have taken advantage of the opportunity to know people who are completely different from you. Because one of your great strengths in whatever endeavor you undertake will be an openness to other ways of looking at life, an ability to work with people who think and look different to build commonalities of purpose and will.

Commencement is a very special time not only for you but for Stony Brook. It is the time when we know the importance of what we do because we realize the impact that you—our graduates—will have on the future.

May your journey be full of happiness.

Shirley Strum Kenny, President

JOHN HENNESSY
DOCTOR OF SCIENCE

Degree Conferred at Main Commencement Ceremony

Stony Brook University alumnus and Stanford University President John L. Hennessy is a scholar and businessman who pursues new standards of excellence in higher education and creative visions that drive science and technology to new frontiers.

Dr. Hennessy grew up in Huntington, Long Island, and received his bachelor's degree in electrical engineering from Villanova University in 1973. He received his master's and doctoral degrees in computer science from Stony Brook University in 1975 and 1977, respectively. A member of the Stanford faculty since 1977, Dr. Hennessy's original research area was optimizing compilers; his research group at Stanford developed many of the techniques now in commercial use.

In 1981, Dr. Hennessy initiated a project at Stanford that focused on a simpler computer architecture known as RISC (Reduced Instruction Set Computer), a technology that has revolutionized the computer industry. In addition to his role in the basic research, Dr. Hennessy played a key part in transferring this technology to industry. During a sabbatical leave in 1984-85 he co-founded MIPS Computer Systems, now known as MIPS Technologies, which specializes in the production of microprocessors.

In recent years, Dr. Hennessy's research has focused on building high-performance computers and in making such machines useful to a wide variety of potential users. One goal is to make computer cycles so inexpensive that massive amounts of computer power can be applied to solve problems ranging from large-scale scientific simulations to simple sensory tasks such as speech recognition.

Dr. Hennessy has been recognized with such honors as the prestigious John von Neumann Medal, awarded by the Institute of Electrical and Electronics Engineers, of which he is a fellow. He is also a member of the National Academy of Engineering, a fellow of the American Academy of Arts and Sciences, and a fellow of the Association for Computing Machinery.

John Hennessy has shown extraordinary leadership in one of the most prestigious universities in the world. We are honored to confer upon Dr. Hennessy the honorary degree of Doctor of Science.

SUSAN SOLOMON
DOCTOR OF SCIENCE

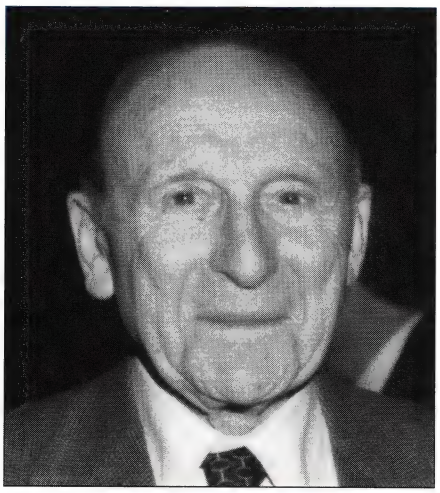
Degree Conferred at Doctoral Ceremony

A researcher on the forefront of international efforts to understand global ozone loss, short- and long-term climate change, and the effects of industrial production and the release of various chemicals into the atmosphere, Dr. Susan Solomon has had a notable impact on our understanding of important issues in atmospheric chemistry. Now a senior scientist at the National Oceanic Atmospheric Administration (NOAA) Aeronomy Laboratory, Dr. Solomon established the conclusive link between man-made chlorofluorocarbons (CFCs) and the ozone "holes" in the atmosphere above Antarctica. Her findings on this environmentally significant phenomenon have been prominent among those that led to an international protocol to control CFCs and have forged major new directions in environmental research.

Dr. Solomon was born in Chicago, Illinois, and attended the Illinois Institute of Technology at Chicago, from which she received a bachelor's degree in chemistry. She received her master's and doctoral degrees in chemistry from the University of California at Berkeley. Her research interests focus on stratospheric chemistry, especially observations and interpretation of the chemistry of the Antarctic ozone "hole." In 1986 and 1987, she served as the Head Project Scientist of the National Ozone Expedition at McMurdo Station, Antarctica. She is the lead author of numerous scientific papers that have provided key measurements and theoretical understanding regarding Arctic and Antarctic ozone destruction. She has been a member of numerous advisory committees for the National Academy of Sciences, the National Science Foundation, and the National Aeronautics and Space Administration.

The youngest member ever elected to the National Academy of Sciences, Dr. Solomon's many honors include the Commonwealth Award for Science and Invention, the J.B. MacElwane Award from the American Geophysical Union, the Henry G. Houghton Award from the American Meteorological Society, as well as both the Gold Medal and the National Medal of Science from the U.S. Department of Commerce. Dr. Solomon has testified on the ozone issue to both Senate and House subcommittees concerned with the environment, and she is widely considered one of the world's leading experts on this topic. Stony Brook University is delighted to confer upon Dr. Solomon this honorary degree of Doctor of Science.

HONORARY DEGREE RECIPIENT



ERWIN STALLER
DOCTOR OF HUMANE LETTERS

Degree Conferred at Main Commencement Ceremony

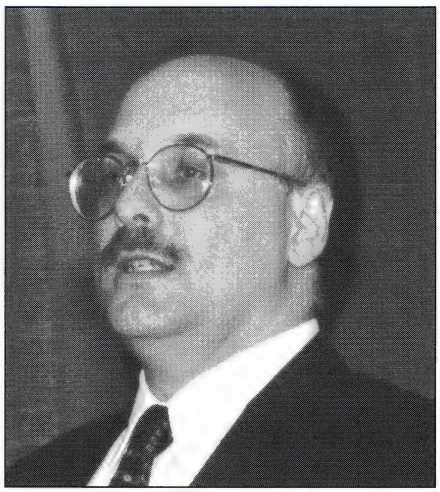
A man whose philanthropy has transformed the arts at Stony Brook University and the entire Long Island region, Erwin Staller has been a lead and major donor to the University for the past two decades. As a member of the Stony Brook Foundation (SBF) Board of Trustees for more than 14 years, Mr. Staller has been instrumental in the growth and development of our campus. His naming gift of more than $2 million for the Staller Center for the Arts in 1987 was the largest single gift to Stony Brook at that time and opened the door for numerous additional gifts from both the private and corporate sector. He has also provided unique philanthropic leadership for the SBF Board of Trustees and for the friends, corporate partners, and alumni of the University.

Mr. Staller's total dedication to the University and the arts center that bears his family name is a model for supporters of Stony Brook. He has continually brought family and community members into the University circle, and their contributions have been instrumental in the growth of the Staller Center and its programs. Mr. Staller's great gifts have served as a powerful stimulus to other philanthropists as well, and in this way, Mr. Staller's support of the University has been further magnified and has helped to enrich many additional campus programs.

A strong community leader, Mr. Staller has also been active with various other Long Island organizations, helping to raise awareness and funds for such organizations as the Suffolk Center for Emotionally Disturbed Children, the Hecksher Museum, Huntington Hospital, and the Family Service League.

Mr. Staller is a tireless champion for the University and its connection with the larger community. His sensitivity to the arts and to cultural development has benefited us all. From new programming initiatives, to capital projects, to scholarship support, Mr. Staller has provided continued leadership and support for the Staller Center, and, of course, the University at large. We are grateful for Erwin Staller's philanthropic efforts and his deep love for this campus, and it is with great honor that we confer upon him this honorary degree of Doctor of Humane Letters.

UNIVERSITY MEDAL RECIPIENT



RICHARD NASTI

Conferred at Main Commencement Ceremony

Stony Brook Council chair and University alumnus Richard Nasti has been an important part of Stony Brook's recent achievements. Since his appointment by Governor Pataki in 1996, Mr. Nasti has developed a highly effective governance council for Stony Brook; however, his record of significant accomplishments and public service predates his involvement with the Stony Brook Council by many years.

Mr. Nasti graduated *summa cum laude* (4.0 G.P.A.) from Stony Brook in 1978 with a double major in economics and political science and earned a law degree from the University of Pennsylvania. Previously chief staff counsel to United States Senator Alfonse D'Amato and appointed by President Ronald Reagan to the position of Regional Administrator of the Urban Mass Transportation Administration, he was also a vice president in the Municipal Finance Department of PaineWebber and General Manager of the *New York Post*. Currently, Mr. Nasti is Senior Vice President and Chief Financial Officer of H.J. Kalikow and Co., a real-estate firm in New York City. In addition, he continues to advise the Pataki administration on transportation and education issues.

Stony Brook University has been the beneficiary of Mr. Nasti's leadership and concern for his alma mater in countless ways. He has been a most active and involved Stony Brook Council chair, raising the bar on the intensity and quality of involvement. Mr. Nasti has been a powerful advocate for Stony Brook. As a distinguished alumnus and humanitarian, he has shown creativity in devising ways to help Stony Brook. Recently, he has been the driving force behind the establishment of the Alfonse M. D'Amato endowed chair in Italian American Studies at Stony Brook. In addition, he has been instrumental in securing the fiscal support from the New York State Legislature that enabled this University to embark on the Long Island Cancer Center initiative. This initiative will represent a multidisciplinary, comprehensive cancer center and community network for the entire region, providing world-class research and the best clinical care for patients and their families.

Mr. Nasti has tirelessly sought new ways of serving the University by bringing his many leadership abilities, talents, and spheres of influence to the task of advancing Stony Brook. A loyal and devoted alumnus who has given back to his alma mater in generous measure, Mr. Nasti deserves high esteem from the Stony Brook community. In gratitude and recognition of his efforts, we are honored to confer upon Richard Nasti the University Medal.

UNIVERSITY AWARDS

WARD MELVILLE VALEDICTORIAN AWARD

In honor of the first chairperson of the Council of Stony Brook University, the University's most distinguished undergraduate honor, the Ward Melville Valedictorian Award, is given to the graduating senior who has attained the most outstanding academic record during four years at Stony Brook.

H. LEE DENNISON VALEDICTORIAN AWARD

The H. Lee Dennison Award, named in honor of Suffolk County's first chief executive, is presented to the graduating senior who entered Stony Brook as a transfer student, completed at least 60 credits of letter-grade work at Stony Brook, and attained the most outstanding academic record at Stony Brook in that work.

PRESIDENT'S AWARD TO DISTINGUISHED DOCTORAL STUDENTS

This Stony Brook Foundation award is made possible by Dr. Donald Squires and Dr. Marian Steinberg. Criteria for selection include the quality of the dissertation and its research base, the student's outstanding contributions in ability or service to the University, or the student's overcoming of personal or social handicaps. This year's recipients are:

Katherine Cherbas (Music), Doctor of Musical Arts in Cello Performance

Adrian Johnston (Philosophy), *Time Driven: Metapsychology and the Splitting of the Drive*

Dehai Liang (Chemistry), *DNA Separation by Capillary Electrophoresis: Novel Types of Separation Media and Enhancements*

Yuxie Pu (Materials Science and Engineering), *Polymer Rheology in Confined Geometry*

Kwan Woo Shin (Materials Science and Engineering), *Nano Structured Polymer Thin Films*

ACADEMIC ATTIRE

The costume of those in the academic procession has a specific symbolism that dates back to at least the fourteenth century. Academic institutions in the United States adopted a code of academic dress in 1895 that has been revised from time to time. The dress of institutions in other countries varies, and there is not a worldwide code, but the basic elements are present in all academic costumes.

GOWNS—The bachelor's gown has long, pointed sleeves; the master's gown has an oblong sleeve open at the wrist (some older gowns may be open near the upper part of the arm); the doctoral gown is fuller than the others with full-length velvet panels on the front and three velvet crossbars on each sleeve in black or in the color distinctive to the discipline of the wearer's degree. The gowns are black except for a few doctoral gowns, the color of which represents the degree-conferring institution.

HOODS—The hood, draped over the shoulders and down the back, indicates the wearer's alma mater and the discipline in which the degree was conferred. The level of the degree is indicated by the size of the hood. The bachelor's hood is three feet long, the master's is three and one-half feet long, and the doctoral hood is four feet long. The binding of the hood is velvet. The binding is two inches, three inches, and five inches wide for the bachelor's, master's, and doctoral degrees respectively. The lining of the hood is colored according to the institution conferring the degree. The lining of the doctoral hood is revealed more than that of the master's hood. Much less of the lining is revealed in the bachelor's hood.

The colors associated with the degrees are as follows:

Bachelor of Arts • White
Bachelor of Sciences • Golden Yellow
Bachelor of Engineering • Orange
Master of Arts • White
Master of Arts in Liberal Studies • White
Master of Arts in Teaching • Light Blue
Master of Fine Arts • Brown
Master of Music • Pink
Master of Professional Studies • Peacock Blue
Master of Science • Golden Yellow
Master of Social Work • Citron
Doctor of Arts • White
Doctor of Dental Surgery • Lilac
Doctor of Musical Arts • Pink
Doctor of Medicine • Kelly Green
Doctor of Philosophy • Philosophy Blue

CAPS—In the United States, the black mortarboard is most commonly used. The tassel fastened to the center of the cap is normally worn in the left front quadrant of the cap and is black, although it may be the color appropriate to the discipline of the degree. The tassel for the doctoral cap may be gold.

ACKNOWLEDGMENTS

The Office of Conferences and Special Events extends its gratitude to everyone who has made the Forty-first Commencement so successful. Organizations and departments that worked especially hard include Facilities and Services, the Office of Communications, Division of Campus Residences, Division of Information Technology, Division of Physical Education and Athletics, the Office of Educational Technologies, the Office of Records/ Registrar, the Residential Security Program, Staller Center for the Arts, the Stony Brook Foundation, the Student Polity Association Events Management Staff, Student Union and Activities, University Food Service, University Police, and the University staff who have graciously volunteered their time during the Commencement activities.

Plant and floral arrangements were designed and provided by Michael Axelrod and John Klumpp, greenhouse curators.

The state flags displayed around the gymnasium have been hung in the order the states were admitted to the Union, beginning in the left front corner of the gymnasium.

Stony Brook University is an affirmative action/equal opportunity educator and employer. This publication is available in alternative format upon request.

To find yourself, think for yourself.
